

# RATIO CONTROLLER WITH ANALOG CONTROL OUTPUT AND HIGH / LOW ALARMS

### **Features**

- Controls the desired ratio between a main and an additive flow.
- Displays flow rate A and B, alarms, ratio setpoint and actual ratio in percentage.
- Large 17mm (0.67") digits.
- Safety mode input to place the controller in a safe predefined position.
- Analog output to control a valve.
- Two alarm values can be entered in %: low and high ratio alarm.
- Bumpless switching between 3 operation modes: Hand, Local and Ratio.
- Green LED-backlight.
- Very compact design for panel mount, wall mount or field mount applications.
- Operational temperature -30°C up to +80°C (-22°F up to 178°F).
- Explosion/flame proof 🕢 II 2 GD EEx d IIB T5.
- Full Modbus communication RS232/485/TTL.
- Loop or battery powered, 8 24V AC / DC or 115 230V AC power supply.

### Signal output

- (0)4 20mA / 0 10V DC control output.
- Two alarm outputs for low and high ratio alarm.

## Signal input

### Flow

- Reed-switch.
- NAMUR.
- NPN/PNP pulse.
- Sine wave (coil).
- Active pulse signals.
- (0)4 20mA.
- 0 10V DC.

### Status

• Safety mode input.

### **Applications**

• In-line blending can be significantly affected by its control operations. The F124 ratio controller will show a strong influence of maintaining a good and constant quality of products and saves money on the blending components.

### **General information**

### Introduction

The F124 has been designed to ensure that two flows are kept at the same ratio even if the flows are changing. The F124 is a key product of the Fluidwell Process Controller family and is the alternative to replace existing pneumatic controllers in local control loops.

### Operational

There are three operation modes: *Hand*: the control output can be manually changed, there is no loop connection. *Local*: the setpoint can be set and/or changed, corresponding with the process value of flow B. *Ratio*: (normal operation) set the desired ratio in %, the process value corresponds with flow <sup>B</sup>/<sub>A</sub>.

### Display

The display has large 17mm segments which show flowrate A and B, desired ratio and actual ratio. On-screen engineering units are easily configured from a comprehensive selection.

### Configuration

All configuration settings are accessed via a simple operator menu which can be passcode protected. Each setting is clearly indicated with an alphanumerical description, therefore avoiding confusing abbreviations and baffling codes. Once familiar with one F-series product, you will be able to program all models in the series without a manual. All settings are safely stored in EEPROM memory in the event of sudden power loss.

### Analog output signal

The valve of the additive flow is controlled via the (0)4 - 20mA or 0 - 10V DC output signal. The output signal is updated ten times per second. The output signal can be passive, active or isolated where the passive output type will loop power the F124 as well.

### Signal input

The F124 will accept most pulse and analog input signals for flow or mass flow. The input signal type can be selected by the user in the configuration menu without having to adjust any sensitive mechanical dip-switches or jumpers. The analog input versions are even available as 4 - 20mA input loop powered displays.

### Alarm output

Two fixed alarm outputs are available to transmit the ratio alarm condition, 1 low and 1 high alarm output. The output signals can be a passive NPN, active PNP or an isolated electro-mechanical relay. If there is a no-flow the alarm output will be disabled.

### Safety mode

The F124 has a safety mode that keeps on transmitting a pre-defined value as long as the contact is made. After releasing the contact, the former value and function will be reinstalled.

### Communication

All process data and settings can be read and modified manually or through the Modbus communication link (RS232 / RS485). Full Modbus functionality remains available for the Intrinsically Safe version (TTL).

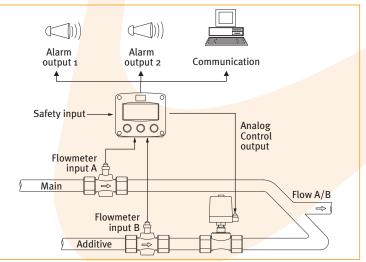

### Hazardous areas

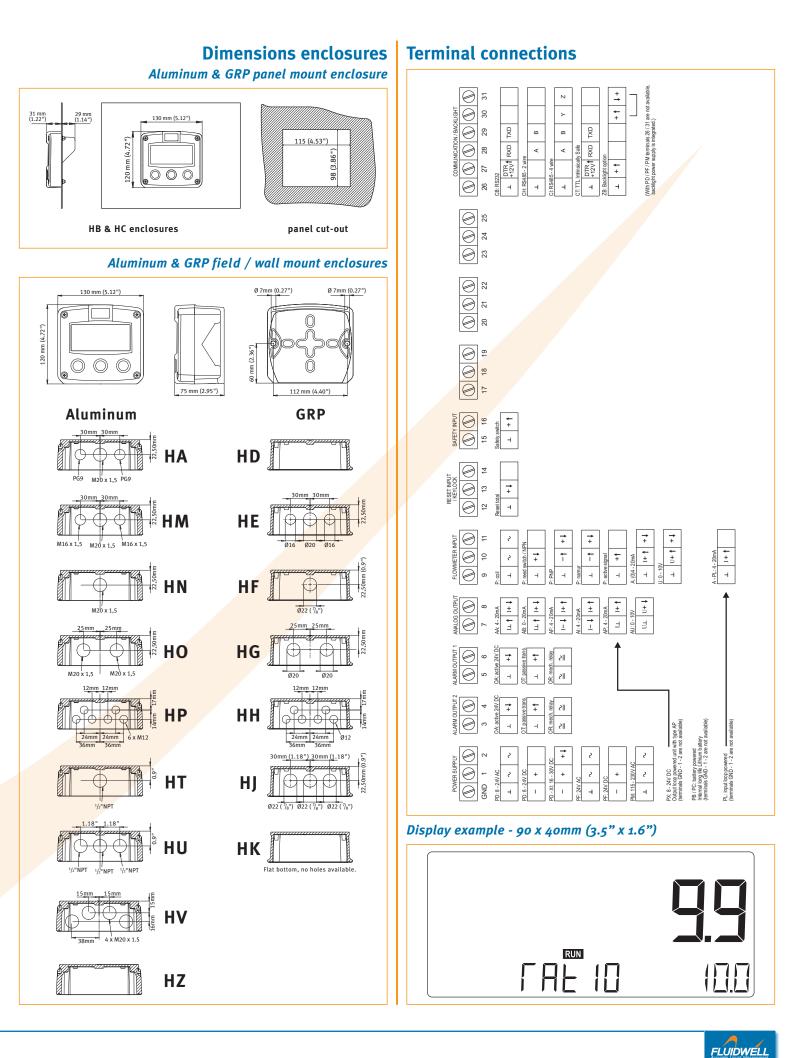

For hazardous area applications, this model has been ATEX certified Intrinsically Safe FII 1 GD EEx ia IIB / IIC T4 T100°C with an allowed operational temperature of -30°C to +70°C (-22°F to +158°F). A flame proof enclosure is also available with the rating FII 2 GD EEx d IIB T5.

### Enclosures

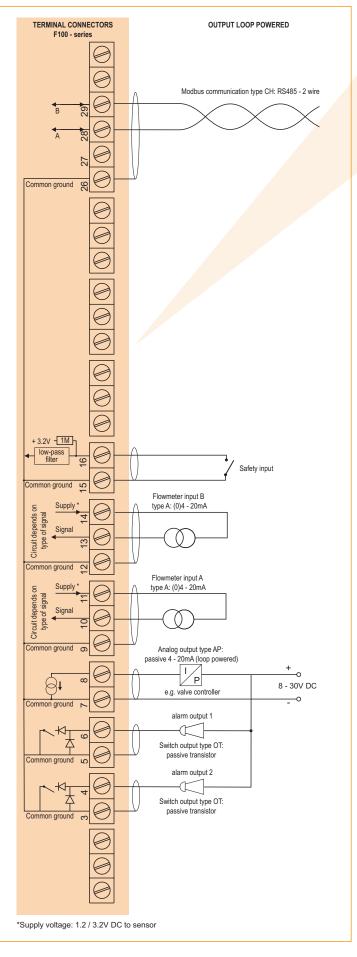

All enclosures are ATEX approved. As standard the F124 is supplied in an GRP panel mount enclosure, which can be converted to an IP67 / NEMA 4X ABS field mount enclosure by the addition of a back case. Most popular is our rugged aluminum field mount enclosure

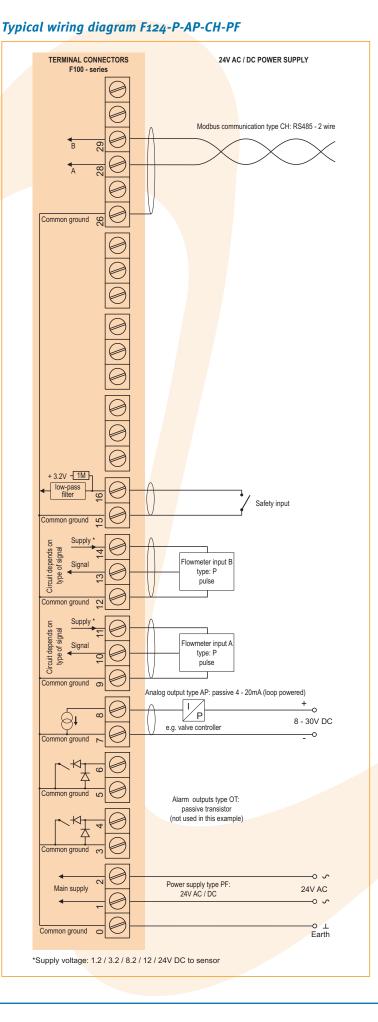

### **Overview application F124**

#### Typical wiring diagram F124-A-AI-CI-OR-PM

### Hazardous area applications

The F124-XI has been ATEX approved by the KEMA for use in Intrinsically Safe applications. It is approved according to ⟨ II 1 GD EEx ia IIB/IIC T4 T100°C for gas and dust applications with an operational temperature range of -30°C to +70°C  $(-22^{\circ}F \text{ to } + 158^{\circ}F)$ . It is allowed to connect up to six barriers in IIB applications or one barrier in IIC applications. Full functionallity of the F124 remains available, including 8.2V sensor excitation for e.g. Namur sensors (type PD) and the Modbus communication type CT. A flame proof enclosure is available as well with rating ATEX ( ) II 2 GD EEx d IIB T5. Please contact your supplier for further details.

| Weight          | 450 gr.   |
| Type HS         | Cable entry: no holes.                                |

### Signal inputs

| Flowmeter       |   |
|-----------------|---|
| Туре Р          | Coil / sine wave (minimum 20mVpp or 80mVpp -            |
|                 | sensitivity selectable), NPN/PNP, open collector, reed- |
|                 | switch, Namur, active pulse signals 8 - 12 and 24V DC.  |
| Frequency       | Minimum oHz - maximum 7kHz for total and flow rate.     |
|                 | Maximum frequency depends on signal type and            |
|                 | internal low-pass filter. E.g. reed switch with         |
|                 | low-pass filter: max. frequency 120Hz.                  |
| K-Factor        | 0.000010 - 9,999,999 with variable decimal position.    |
| Low-pass filter | Available for all pulse signals.                        |
| Option ZF       | coil sensitivity 10mVpp.                                |
| Туре А          | (o)4 - 20mA. Analog input signal can be scaled to any   |
|                 | desired range within o - 20mA.                          |
| Type U          | o - 10V DC. Analog input signal can be scaled to any    |
|                 | desired range within o - 10V DC.                        |
| Accuracy        | Resolution: 14 bit. Error < 0.025mA / ± 0.125% FS.      |
|                 | Low level cut-off programmable.                         |
| Span            | 0.000010 - 9,999,999 with variable decimal position.    |
| Update time     | Four times per second.                                  |
| Voltage drop    | Type A: 2.5V @ 20mA.                                    |
| Load impedance  | Type U: 3kΩ.  |
| Relationship    | Linear and square root calculation.                     |
| Note            | For signal type A and U: external power to sensor is    |
|                 | required; e.g. type PD.                                 |
|                 |   |

### **External inputs**

| Function    | Safety input.   |
|-------------|---|
| Description | Terminal input to activate the predefined safety ratio. |
|             | Internally pulled-up switch contact - NPN.              |
| Duration    | Minimum pulse duration 100msec.                         |

Signal outputs Analog output Controlling the ratio between flow A and B. Function 10 bit. Error < 0.05%. Analog output signal can be Accuracy scaled to any desired range. Update time Ten times per second. Active 4 - 20mA output (requires PD, PF or PM). Type AA Type AB Active o - 20mA output (requires PD, PF or PM). Type AF Passive floating 4 - 20mA output for Intrinsically Safe applications (requires XI + PC or PD). Type AI Passive galvanically isolated 4 - 20mA output - also available for battery powered models (requires PB, PD, PF, or PM). Type AP Passive 4 - 20mA output - not isolated. Unit will be loop powered. Type AU Active o - 10V DC output (requires PD, PF or PM).

#### Alarm /pulse output

| Function  | Low or high ratio alarm output.                        |
|-----------|--|
|           | Alarm value limits: o - 100%.                          |
| Frequency | Max. 64Hz. Pulse length user definable between         |
|           | 7.8 msec up to 2 seconds.                              |
| Type OA   | Two active 24V DC transistor outputs (PNP);            |
|           | max. 50mA per output (requires AA + PD, PF or PM).     |
| Type OR   | Two electro-mechanical relay outputs isolated (N.O.) - |
|           | max. switch power 230V AC - 0.5A (requires PF or PM).  |
| Type OT   | Two passive transistor outputs (NPN) - not isolated.   |
|           | Max. 50V DC - 300mA per output.                        |

#### Communication option Reading display information, reading / writing all Function configuration settings. Protocol Modbus RTU. Speed 1200 - 2400 - 4800 - 9600 baud. Addressing Maximum 255 addresses. Type CB RS232 Type CH RS485 2-wire Type CI RS485 4-wire Type CT TTL Intrinsically Safe.

| Safety output   | -5.0 to 105.0% (0) = Run / (1) = Safety output. |
| Control output -5.0 to 105.0% for both high and low limits. |   |
| limiter   |   |

#### Accessories

| Mounting ac | cessories   |
|-------------|---|
| ACF02       | Stainless steel wall mounting kit.                  |
| ACF05       | Stainless steel pipe mounting kit (worm gear clamps |
|             | not included).                                      |
| ACFo6       | Two stainless steel worm gear clamps Ø 44 - 56mm.   |
| ACF07       | Two stainless steel worm gear clamps Ø 58 - 75mm.   |
| ACFo8       | Two stainless steel worm gear clamps Ø 77 - 95mm.   |
| ACF09       | Two stainless steel worm gear clamps Ø 106 - 138mm. |
| ACF10       | Customized Grevopal tagplates for ACFo2 and ACFo5,  |
|             | including stainless steel screws.                   |
|             | Dimension: 95mm x 12.5mm (3.75" x 0.50").           |
